List of figure

Figure 1.1. Illustration of social graphs types **(G1)** is an undirected and unweighted graph, **(G2)** is a directed graph, **(G3)** is a weighted graph.

Figure 1.2. Illustration of friendship distance in Twitter (image from[4]).

Figure 1.3. Illustration of triadic closure principle**.**

Figure 1.4. Illustration of clustering coefficient example.

Figure 1.5. Information diffusion types in social networks (image from [10]).

Figure 1.6. Information cascade illustration.

Figure 2.1 Main research challenges arising from information diffusion in online social [9].

Figure 2.2 Updated taxonomy of information diffusion.

Figure 2.3 Illustration of the above definition **(**A) example of valid flow path (B) example of frequent flow path with frequency=f**.**

Figure 2.4 Illustrate social graph example**.**

Figure 3.1 Alchemy Api keywords extraction illustration.

Figure 3.2 Approach architecture.

Figure 3.3 Snapshot of the original DBLP XML file.

Figure 3.4 Snapshot of the social stream data file.

Figure 3.5 Illustration of the social stream reorganization for the third step in *Detectpaths2***.**

Figure 3.6 Top 11 influencers obtained from the first execution.

Figure 3.7 Top 11 influencers obtained from the second execution.

Figure 3.8 Comparison between 1st and 2nd execution results.
